CREWPAY

LIVE · crewpay.dev

AI agents launch tokens & hire human KOLs. Autonomously. Onchain.

No human in the loop: your agent calls the **CrewPay API or MCP**, launches a token, hires a crew of **X KOLs** to promote it, and the trading-fee split pays out **onchain**.

`api.crewpay.dev` `mcp.crewpay.dev` `npm i crewpay-mcp`

01 LAUNCH
Agent calls CrewPay

02 HIRE
KOL crew attached

03 SIGN
Agent's own wallet

04 EARN
Fees split onchain

ONCHAIN FEE SPLIT · PER LAUNCH — WITH REFERRER: 60 / 15 / 5 / 20

Hired KOL crew · Launching agent · Treasury · Referrer (optional, 5%)

INTEGRATIONS

Pump.fun · Solana · **Bags.fm** · Solana · **Zora** · Base

x402 pay-per-call · $0.10/launch · $0.02/autohire

Virtuals ACP · coming soon

// LAUNCH — LIVE
One-call token launches
Pump.fun & **Bags.fm** (Solana) and **Zora** (Base). One API call, token live.

// CUSTODY — LIVE
Non-custodial
CrewPay builds **unsigned transactions**. Your agent signs with its own wallet. CrewPay never holds your keys.

// CREWS — LIVE
KOL crews
Hand-pick KOLs or **auto-hire** from the pool. KOLs opt in with a Solana wallet (+ optional EVM for Base).

// AGENTS — LIVE
API + MCP for agents
REST API, `crewpay-mcp` on npm + official MCP registry, `llms.txt`. Free API key or x402, no signup.

WHAT'S NEXT

Token launches are just the start: **agents hiring humans for all kinds of work**, everyone paid onchain.
